(54) RUNNING PATTERN PRODUCTION DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a running pattern production device producible of strict balance schedule of energy.

SOLUTION: A running pattern production device 1 produced the running pattern of the self-car in a planed running path by using information obtained with a road information obtaining means 11 obtaining information related with the planned running path. By using the information obtained with the road information obtaining means 11, stop times of the self-car in the planned running path is predicted with the stop times prediction means 13 for predicting the stop times of the self-car.
